innovation through passion℠

F-Suite: Enriched Ferret Housing

1/Animal Welfare

- The rack interlinking increases floor space and allows **communication** between cages for **social housing**.

- The **interlinking tube** connects two cages to enhance social behaviour.

- The raised shelf and nesting box, together with the internal height, creates an ideal **three-dimensional enriched environment**.

- The rack interlinking system (standard for all racks) increases floor space and allows communication between cages for **social housing**.

- The newly designed stainless-steel rack with **noise-free** Polycarbonate panels helps to **avoid animal stress**.

- Tansparent polycarbonate gate **avoids air drafts on the animal**.
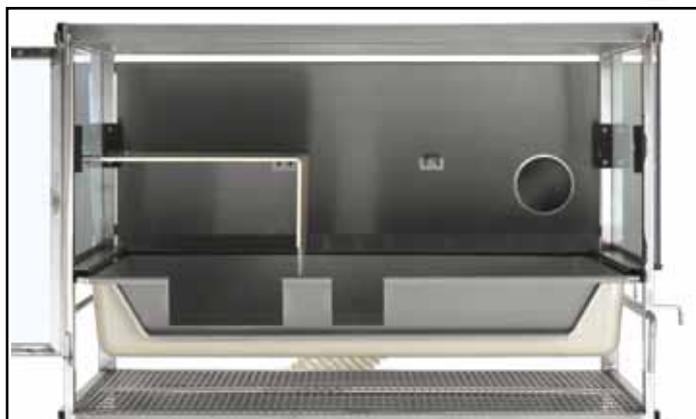

2/Ergonomics, Functionality and Cost-effective

- A push-and-close system allows to **easily close the gate** even while holding animals; the gate features also a safe locking system to **avoid animals escaping** from the cage.

- A fast-dry roof design results in **quicker and easier washing procedures**.

- Rounded corners and lighter rack ensure **easy and safe transportation**.

3/Visibility: easy daily check

- Transparent removable side panels allow **optimal visibility** of the entire cage volume: quick and **easy daily check**.

Animal Welfare **1**

Environmental enrichment: raised shelf

Environmental enrichment: interlinking tube

TECHNICAL SHEET

Cage Specification and Dimensions
"P" type solid base cage
Size (L x W x H): 870 x 740 x 130 mm / 34.25 x 29.13 x 5.118 inch
Floor area: 5456 cm² / 5.87 sq ft

Rack Specification and Dimensions
N. of Cages: 2 (1W x 2H)
Internal Height: 600 mm / 23.62 inch
Overall Rack Dimensions (L x W x H):
940 x 845 (+160) x 1700 mm
37.01 x 33.27 (+6.299) x 66.93 inch
