

- System designed to increase density
- Available for all GM racks: maximum flexibility
- Silent: no animal stress

Introduction

The system follows the bookshelves concept to increase the density: Library system is available as **Mouse Library Plus (ML⁺)** where the racks are **moved by the operator** and as **Motorized Mouse Library (MML⁺)** where a **motorized wheel** activated by a button moves the racks.

1/Increased Density

- Library system features **reduced distance between racks**, since it allows **them to be move** thus creating the necessary space for daily check or cage change: **up to 30% more density** when 100% occupancy is not enough.
- Create your space for easy daily check, cage change or mice observation: **more density, same ergonomics**.

2/Ergonomics and Flexibility

- The system is **easy to install**.
- Racks can be easily moved to washing area and autoclave with **no need for any tool**.
- ML⁺ can be **upgraded** to MML⁺ with the retrofit motorized wheel kit.

3/Animal Welfare

- The library system moves silently: **no stress for the animal**.
