

HOMEOTHERMIC BLANKETS AND SURGERY TABLES FOR RATS, MICE & RABBITS

Homeothermic blankets/surgery tables for rat, mice and rabbits maintain an animal's body temperature at a preset target value via the feedback provided by a rectal probe (range 32-45°C). No broadcasting of electrical noise. The DC proportional Thermoregulation Controller does not switch current on and off like a thermostat, but statically avoiding broadcasting of electrical noise. The digital display continuously monitors the target and actual present temperature

Mice homeothermic pad 9 x 11,5 cm with YSI 402 rat/mice rectal temperature probe
 Mice homeothermic pad 9 x 11,5 cm pad with YSI 451 mice rectal temperature probe
 Rat homeothermic soft blanket 15 x 25 cm with YSI 402 rat/mice rectal temperature probe
 Rabbit homeothermic soft blanket 40 x 70 cm with YSI 401 rectal temperature probe
 Rat homeothermic pad 10 x 23 cm with YSI 402 rat/mice rectal temperature probe
 Hamster homeothermic pad with YSI 402 rat/mice rectal temperature probe
 Hamster homeothermic pad with YSI 451 mice rectal temperature probe
 Mice homeothermic soft blanket 10 x 15 cm with YSI 402 rat/mice rectal temperature probe
 Mice homeothermic soft blanket 10 x 15 cm with YSI 451 rat/mice rectal temperature probe
 HEATED Operating table 28 x 21cm. High 15 cm Tilting model with electronic unit HB 121
 Small animals 22 x 32 cm operating tilting table. (32 x 22 x 15 cms) Not Heated . Picture left below
 HEATED Medium size animals operating table (700 x 400 mm) with electronic unit HB 121

Surgery table code OT 100

The 51375 (picture at right) rodent surgery table is an attractive, durable table useful for surgery, perfusion, or autopsy on small animals. The top is 32 x 22 cm, and has slots to accommodate an assortment of accessories (included). Base is metal with non-slip feet. Several accessories, all of stainless steel, may be used to secure the animal to the table, retract tissue, etc. These include: vertical rods that install in the table slots and support bossheads that hold a horizontal rod, clamps that grip the rods or the table edge and anchor a chain, and 15 cm lengths of chain with either alligator clips or 5 cm. lengths of wire on the end. **Code 51375**

Different sizes available including big motorized tables for larger animals

SELF REGULATING HEATING PADS

Animal Biologists performing surgical or physiological experiments on anesthetized animals would like, in those cases where the use of Rectal Probes and Electronic Controllers is not required. Just to warm, not for surgery

Code LCHP - LOW COST HEATING PAD
 2 temperature ranges, Powered 230 Volt AC
