

GUARDIAN
THE WAY TO REMOTE CONTROL

 **TECNIPLAST®**

innovation through passion

GATEWAY
THE WAY TO REMOTE CONTROL

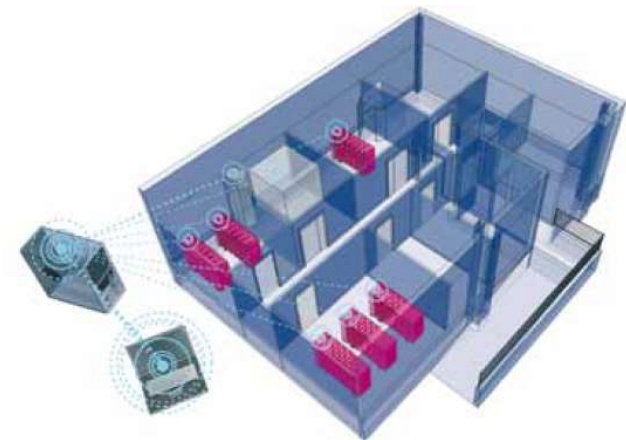

GUARDIAN
THE WAY TO REMOTE CONTROL

ONE 2 ONE

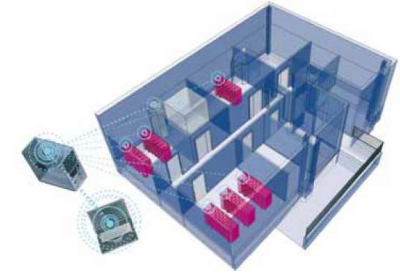

GUARDIAN

innovation through passion

GUARDIAN

All AHUs in the facility (even in different buildings)
can be remotely controlled

innovation through passion

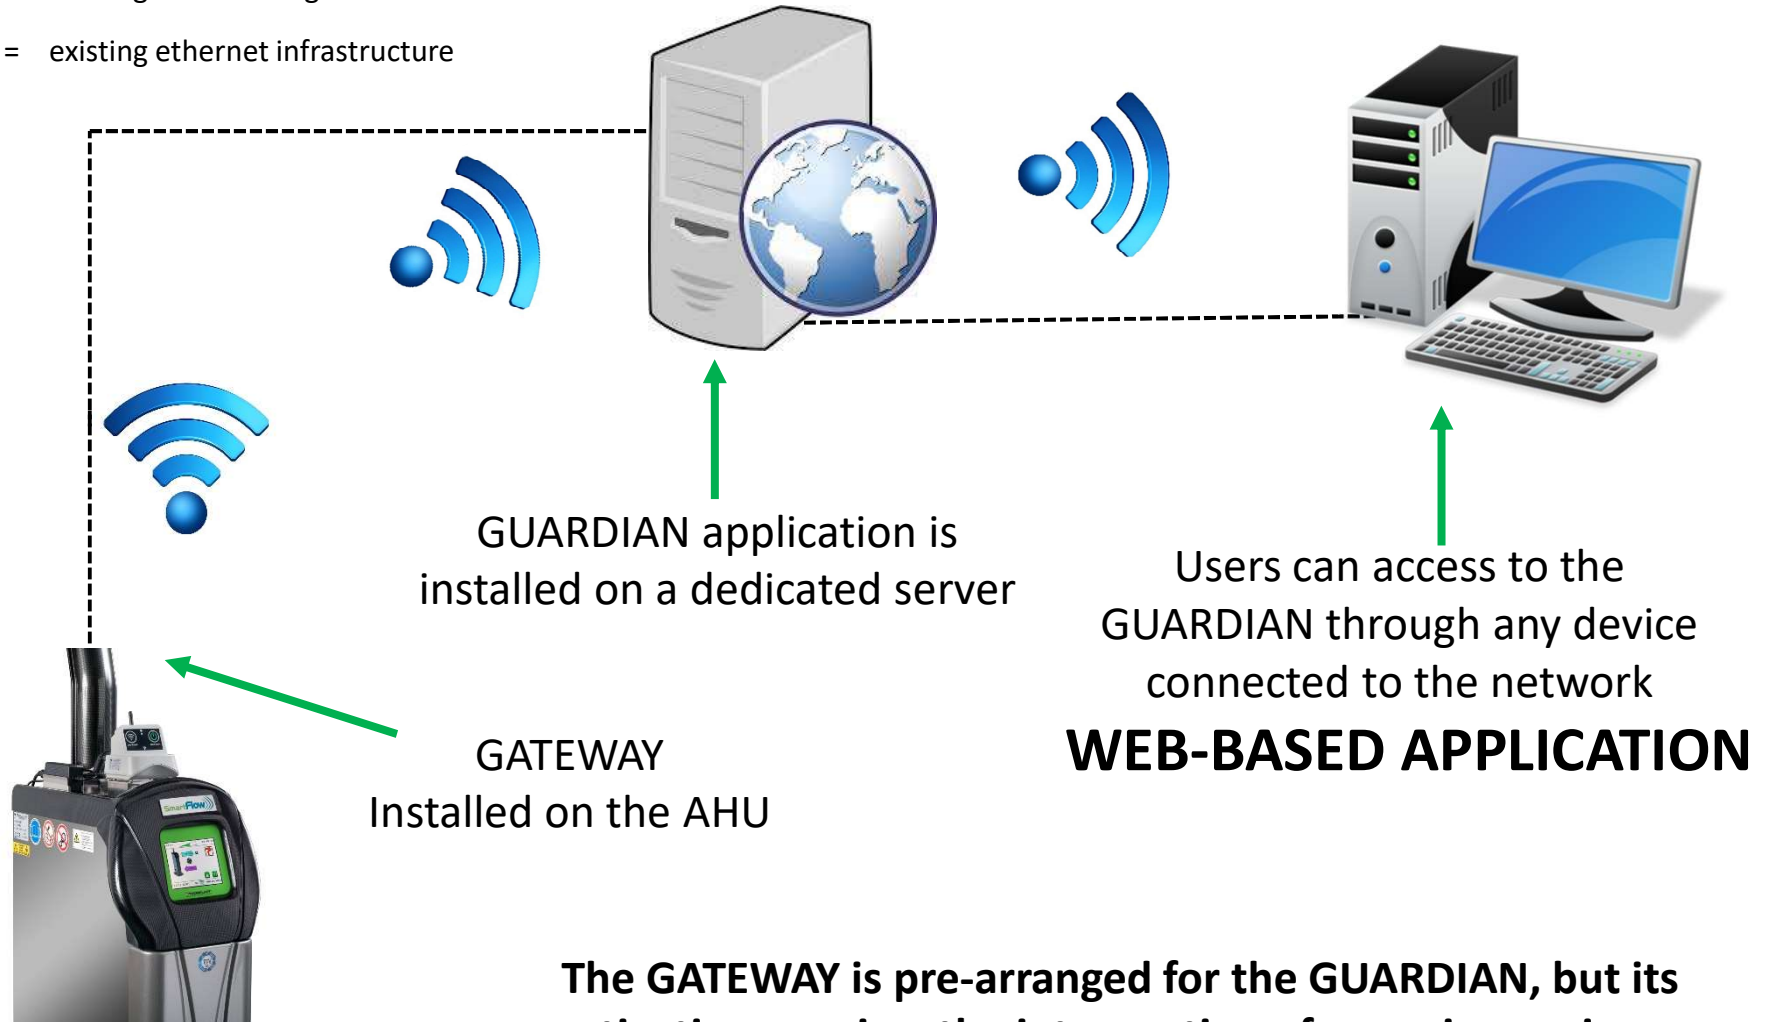

GUARDIAN

= existing Wifi 802.11g

= existing ethernet infrastructure

The **GATEWAY** is pre-arranged for the GUARDIAN, but its activation requires the intervention of a service engineer

innovation through passion

ONE 2 ONE

By pressing the ONE 2 ONE button a local temporarily Wi-Fi network is generated by the unit

By connecting to this network and accessing to any web-browser (Chrome, Mozilla) you have the full control of the unit

**COMPATIBLE WITH ANY DEVICE
(SAMSUNG, APPLE, NOKIA, ...)**

**NO NEED FOR ANY EXISTING
WIFI NETWORK**
