

EOLUS automated Bedding Handling System is designed for the continuous handling, transportation and dispensing of bedding material. EOLUS increases safety and efficiency and improves workflows.

LOADING FUNNEL + SILO(S)

- **Working flexibility:** modular design to easily switch from tote to small bag applications and vice versa
- **High-level operator protection and safety:** suction rings for dust exposure reduction
- **Efficient system workflow:** single or multiple intermediate silo(s) available in different sizes for larger buffer capability.

DISPENSER UNIT

- **Maximum flexibility:** different dispenser models for both manual and automation applications (EASY, FLEXY and FLEXY XL versions)
- **High-level dispensing versatility:** embedded pre- filtering system and mixer for a wide range of bedding types processing, including light-weight bedding materials
- **High-level operator usability and protection:** integrated touchscreen panel and efficient suction rings technology at the dispensing points.

TECHNICAL COMPARTMENT

- **Compact dimensions with minimal footprint:** compact, all-in-one solution which includes the vacuum pump, the filtration unit and the control box
- **Layout flexibility:** available in two sizes (COMPACT, REGULAR) and designed to fit all specific customer requirements.
- **Filtration unit with high-level operator protection:** easy-sealing bag system and HEPA filter (H14).
